## Certified Traps – AIHTS Implementation in Canada

The Canadian Wildlife Directors, Competent Authorities for implementation of the Agreement on International Humane Trapping Standards (AIHTS) have approved a 2-phase process for implementing the AIHTS in Canada. The following list shows the two phases for regulating species-specific traps: (1) the **certified traps** currently regulated for specific species; (2) **certified traps** that are not regulated at this time. **Check with your provincial or territorial government to confirm regulations related to trap uses applicable in your trapping area.**

Updated April 1, 2026 – (Any addition to this list is highlighted and marked in Bold)

### PHASE 1 - KILLING TRAPS - Certified traps currently regulated for use per species

### PHASE 2 - YEAR OF IMPLEMENTATION TO BE DETERMINED

Although the traps listed in Phase 2 are certified for the following species and trap categories, the year of entry into force of the obligation to use only AIHTS Certified traps has not yet been determined. This date, which could vary from one species to another, will be known at least 3 years in advance. *Until then, traps that are currently legally permitted can still be used. Check with your provincial or territorial government to confirm regulations related to trap uses applicable in your trapping area.*

### PHASE 2 - RESTRAINING TRAPS - Traps certified per species but not yet mandatory
